Planetary™ Organics Introduces Haiku Organic Chlorella™

Organic Superfood Contains Potent Nutrients

Scotts Valley, CA - Over two billion years ago, a life form emerged in the shrouded mists: it was a single-celled alga with a nucleus and strong cell walls that protected its nutrients. This life form, chlorella, is now becoming widely acclaimed as one of the most healthy superfoods on earth.

Planetary™ Organics herbalist Roy Upton says, "Chlorella has been a staple as a healthful, nutrient-rich detoxifier among health food aficionados for decades. It was one of the earliest herbal superfoods introduced to the market and has persisted because of its nutrient density and rich source of chlorophyll. Making it available as a certified organic product completely free of binders takes chlorella to a new level."

Planetary Organics Haiku Organic Chlorella™ is cultivated under strict USDA Certified Organic regulations, ensuring a superior form of chlorella. The tablets are 100% pure organic broken cell wall chlorella and include no binders or fillers.

Planetary Herbals integrates the best of worldwide herbal traditions with modern clinical and pharmacological research. The result is an herbal product line that is unequalled for efficacy, safety, and dependability. For more information or purchase locations, please visit <http://www.planetaryherbals.com>.
